### Summary of Position:

The ideal candidate will for this role will be a well-rounded PHP developer with a wide range of experience in web development with knowledge of LAMP development and backend OO PHP code. This role includes understanding and participating in defining project requirements, reviewing code and responsibility for creating modular, scalable, and well-written websites.

### Duties and Responsibilities:

- Work with PHP and MySQL to design, develop and debug web applications
- Create/maintain/integrate modular, scalable front end websites
- Integrate back-end services with PHP/JavaScript based front end needs
- Customise various CMS backends including WordPress & Drupal
- Plan, develop, implement, test, and maintain system architecture of WordPress (and/or Drupal) websites
- Work with the team to manage, optimise and customise multiple web applications
- Refactor previously written code by other developers
- Create and maintain technical documentation
- Work independently but also in collaboration with Web Producers and Technical Manager
- To innovate and create web applications

### Essential Skills:

- Bachelor's degree and/or 3+ years of development experience or equivalent, including Object Oriented design and PHP Development
- Proficiency with front-end development and scripting including: HTML 5, CSS 3, JavaScript, jQuery, AJAX
- Knowledge of working with WordPress and Drupal
- Familiar with bootstrap framework and methodology

- Hands-on experience with web application architecture and relational database design
- Knowledge of search engine optimisation (SEO) and development best practices within SEO
- Able to demonstrate proficiency in planning, developing and implementing modular and scalable website front ends with focus on user experience
- Experience of building sites to function cross-platform and cross-browser
- Experience of building database-driven applications and web sites
- Strong presentation, communication, and collaboration skills enabling effective interaction and knowledge transfer to teammates and other departments within the company
- Excellent time management and task prioritisation abilities
